Subject: Request for comments on “Allocations of Spectrum for Technologies such as DECT, to meet the Residential and Enterprise Intra-Telecommunication Requirements” dated February 19, 2010

On behalf of Philips, we appreciate a lot to have to opportunity to comment on “Allocations of Spectrum for Technologies such as DECT, to meet the Residential and Enterprise Intra-Telecommunication Requirements” and we fully support the DFI proposal.

To be able to deliver competitive DECT products, to guaranty the excellent voice quality and radio link reliability for the benefit of the end user, Philips suggests to use the unallocated frequency band 1900~1920Mhz as proposed by DFI.

Respectfully submitted,

Hong Kong , April 29 2010
