Subject: comment on "consultation paper on amendment to the Standards of Quality of Service for Wireless Data Services Regulations, 2012 "

respected sir,

i am 3g mobile internet user. i would like to say that 3g mobile operators claim to provide speed from 7 mbps to 21 mbps but after using certain amount of data (1gb to 10 gb as per plan)they provide very slow speed in the name of fair usage policy . (only 20 to 40 kbps). we feel cheated for that. they should atleast provide 1 mbps for the rest of validity period so that we can easily access internet.

Sir, request to you, please do something for that.

thank you,

regards,
siddharth jain,
raipur(c.g.)
