18/05/2021

Dear Sir,

This is reference of your article/News in Dainik Bhaskar Jaipur Editions Dated 18/05/2021. I am giving suggestions as Single also Professional User.

1 Although in this news/article main point is validity of period 24/28/56/84 Days should be calculate as Month instead of Days. Because Charges of Pre Paid/Post Paid of any communications services (Internet/Land Line/Cable) monthly basic as per colander weather in same month any days. It means system will calculate Days from Date of Recharge of running month days and next data calculate of next month days as per recharge cycle of 24/24/56/84 Days

2 In current period Pre Paid/Post Paid/Unlimited method of Difference Voucher. But most of User have 2 No of Different Service Provider. Like I am using BSNL and JIO. Even I am using Fiber Internet (50 MBPS) at my home/Office due to require High Speed. So Usually I am recharge JIO for One Year and BSNL for 3 Month (98/99 Rs) JIo for outing and BSNL only for Incoming even you can trat one Personnel and Second as Official. Also for Net 24 GB in JIo or BSNL is sufficient because at Home/Office Fiber is available. But Those who are using one No for Incoming without Net they have to pay in each year approx. 600/- weather BSNL/VI/JIO/Airtel also using Land Line/Internet from Home like I am using for my Daughter/Son and at the end of Day/Year I found hole Year Approx. 600/- is waste due to

using Net/Outgoing Call from Land Line of App. So my suggestions is one recharge only for incoming only and few Call/Time for Outgoing only for Month/Year

3 Still Most of Consumer is using Key Paid Instrument without Net. So One Recharge is also available without Net for those users

Note – I am using my Business Card for your reference

Regards

Murli Dhar Kodnani –
