Reference: TRAI's review of IUC phase out

Dear Sir,

TRAI has already increased TV channels rates for us. We now have to pay through our nose for watching TV after TRAI's intervention to make tariffs supposedly consumer friendly.

Now It is beyond me that why should we pay for high cost of another telecom operator if we are getting call facility free from our own operator. This decision of TRAI to telecom operators will be very expensive for telecom subscriber.

I don't understand that why should telecom rates be increased by IUC when these are going down for so long. Any cost increase for customers in the name of IUC or any other levy will not augur well for telecom subscribers.

We request you to kindly keep the interests of consumers paramount as there appears to be now reason to pay telecom companies an extra money in view of latest low cost telecom technology.

Yours

R. Saly
