Sub: Remove IUC Tariff

Dear Sir/Madam,

The recent changes in the broadcasting tariffs (DTH) by TRAI is painful and we are being made to pay more fees for lesser number of channels which is favoring the TV channels and broadcasters. Now, it is seen that TRAI is also rereading the IUC charges which it had earlier decided to remove from 1st Jan 2020. This would result in increase in charges by operators which will impact the customers further.

As a regulator, you need to preserve the interest of the consumers. TRAI needs to safeguard that cost for customers does not increase for the sake of incomes for telecom operators. We as consumers cannot continue to pay higher tariffs on mobile phones as we are being made to do with DTH connections.

It's my sincere request to continue with your earlier order on elimination of IUC charges and not to overburden us with higher charges.

SUNIL KUMAR SETHI

Thanking You,
