Dear Sir:

**Subject: Feedback on draft UCC regulations released by TRAI on 29<sup>th</sup> May 2018**

We thank you for giving us the opportunity to comment on the the Draft UCC regulations published by TRAI on 29<sup>th</sup> May 2018. This is a key topic that requires focused attention improve the consumer experience in the telecom sector today.

We also appreciate TRAI's selection of Distributed Ledger Technology (DLT) as one of the tools for solving this complex problem. From a strictly technical perspective, DLT's unique features will serve this use case well and we feel that the choice of technology is well-merited, forward looking and will address the unique problems presented by UCC.

As a software firm building an enterprise blockchain platform for business, we look forward to working with TRAI, alongwith our partners, to solve the challenges being faced by the Indian telecom industry. We would be happy to provide any further technical clarification required on the technology choices and DLT platform.

Thanks,

Vivekdeep Gupta
